EDUCATION

- **Ramaiah Institute of Technology** Bangalore, India
Bachelor of Engineering 2019 – 2023
 - **Publication:** Modelling and Control of Tendon Driven Continuum Robot — IJNRD, Vol. 8, Issue 8, Aug 2023 (Impact Factor: 8.76)

SKILLS SUMMARY

- **Languages & Frameworks:** Node.js, TypeScript, Python, ReactJs, SQL, NoSQL, FastAPI
- **Cloud & Infra:** AWS (SQS, SNS, Lambda, SES, S3, API Gateway, RDS, EKS, ECR), Kubernetes, Docker
- **Databases & Tools:** PostgreSQL, MongoDB, DynamoDB, Redis, TypeORM, Git, Keycloak, Grafana

EXPERIENCE

- **Software Engineer — IHX (A Perfios Company)** Bangalore, India
Orchestration Engine · Persistence Engine · Acclaim Backend · Infrastructure Sep 2024 – Present
 - Systems process 20,000 insurance claims/day with 99.99% reliability (~2 failures/day).
 - Architected dynamic claim pipelines with runtime adaptation, fallback routing, and Redis-based sliding-window rate limiting.
 - Replaced ~100 individual DB writes per claim with a single bulk API — cut write ops by ~99%, reducing DB connections and latency.
 - Resolved persistent production timeouts: stale DB statistics caused full scans of 646K rows for 179 results. Targeted indexes and maintenance cut RDS CPU from ~80% to sub-30% and query time by 95%+.
 - Optimized Report Summary API from 2+ min (or crash) to 10–15s via streaming and parallelization — 87%+ improvement.
 - Built V3 config-driven frontend module system (69 TypeScript modules) reducing per-client config from ~29,000 lines to ~500 — a 98% reduction, with 780+ tests at 96%+ coverage.
 - Introduced DLQs and retry logic, eliminating queue blockages; deployed agentic AI workflows improving dev productivity.
 - Built RESTful APIs for healthcare document digitization using FastAPI/Uvicorn with Azure AI Form Recognizer and MongoDB for intelligent document processing.
 - Deployed Python microservices with graceful shutdown, CORS middleware, environment-based configuration, and Grafana telemetry.
- **Software Engineer — Mobil80 Solutions** Bangalore, India
HelloWrk · Posture.ai · StepSync Jul 2023 – Aug 2024
 - Led backend engineering for HelloWrk CRM — integrated SIP protocol and built a full email client using AWS SES.
 - Architected serverless infrastructure (Lambda, API Gateway, AppSync, SQS, DynamoDB, EventBridge) for multiple SaaS products.
 - Built Posture.ai ML platform with OpenID integrations; led StepSync backend with cross-platform fitness tracker compatibility.
 - Directed teams of 4–5 engineers with end-to-end delivery and stakeholder management.
- **Software Trainee — Bosch Global Software Technologies** Bangalore, India
Embedded Systems Jan 2023 – May 2023
 - Built an autonomous maze-solving robot (Arduino/C++) and a roll-over detection system with real-time tilt alerts.

PROJECTS

- **Pasteso — Markdown Code/Text Snippet Platform:** Full-stack web app built from scratch with Node.js and React, featuring user management, public leaderboards, and snippet sharing. Reached **370,000+ unique users** over one year organically. Exclusively on AWS — Lambda, API Gateway, DynamoDB, S3, and CloudFront for global delivery. Built and owned end-to-end including CI/CD pipelines from scratch.

HONORS AND AWARDS

- Ranked **2323** in **GATE 2026 — Data Science & AI** (out of 100,000+ candidates). Topics: Statistics & Probability, Linear Algebra, Calculus, DSA, DBMS, Supervised & Unsupervised ML, Neural Networks, AI Search & Reasoning.
- 10+ Golds at inter-collegiate basketball; 2 Golds at University Games; State-level athletics competitor representing Karnataka nationally (2017–2019).
- Sports Captain, Sindhi High School — led 12-member student council.
- Volunteered with MARSHALL INDIA 2021 under Swachh Bharat, collaborating with Government of Karnataka.
